

Speaker PROV-H Series

PROVCOM speakers are high-quality audio devices designed for professional use in commercial and industrial environments.

These speakers are engineered with advanced audio processing capabilities, ensuring clear and powerful sound output, which makes them suitable for large spaces such as schools, hospitals, malls, and public facilities.

PROV-H-810T

Ceiling Speaker

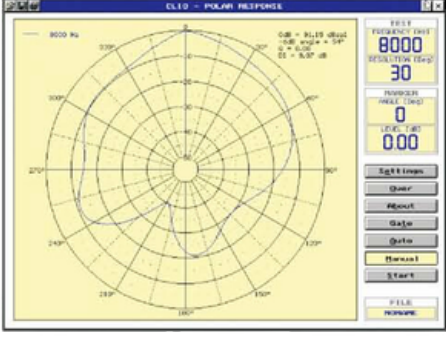

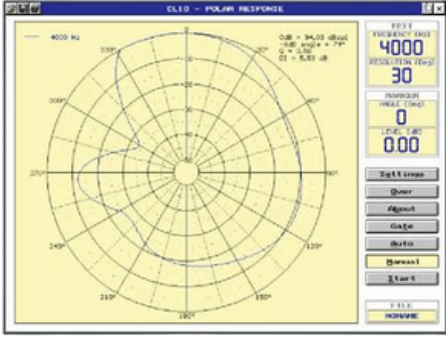

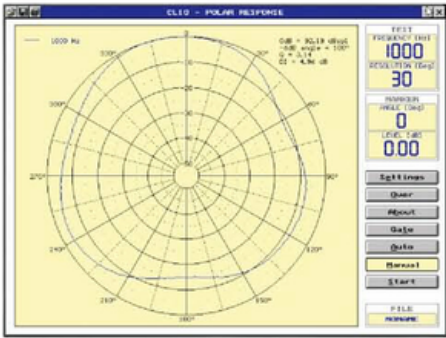

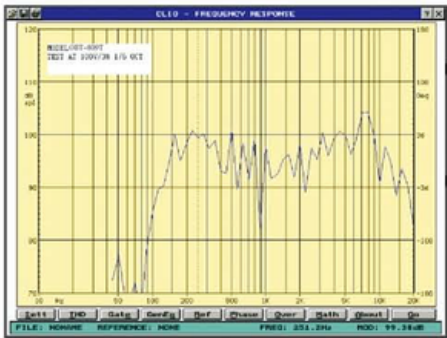

PROV-H-810T Features

- **Clear and balanced sound:** Delivers crisp and clear audio suitable for background music and announcements.
- **Easy integration:** Can be seamlessly integrated into public address systems, making it a great choice for commercial and institutional use.
- **Low maintenance:** The durable materials and build quality reduce the need for frequent maintenance.
- **Cost-effective:** Provides excellent sound quality at a competitive price, making it budget-friendly for large installations.
- **Versatile application:** Ideal for various indoor environments such as schools, offices, hotels, and retail spaces.
- **Reliable performance in distributed systems:** The 100V line input is perfect for long-distance installations without losing audio quality.
- **Even sound distribution:** Ensures consistent audio levels throughout the room, eliminating dead spots.
- **Sleek and minimalistic:** Its modern, clean design blends well with different architectural styles, ensuring it doesn't disrupt the room's aesthetics.
- **Fire-retardant materials:** Made from safe, high-quality materials suitable for public and commercial buildings.
- **Quick and easy installation:** Designed for fast and hassle-free mounting in ceiling setups, saving time for installers.

Product Specifications

General Specifications	
Type	PROV-H-810T
Frequency Response	110Hz - 15KHz
SPL (Sound Pressure Level)	94dB at 10V / 3W
Sensitivity	90 ± 3dB
Power Handling	6W
Line Input	100V
Hole for Mounting	Φ150mm
Dimensions (L × W × H)	Φ170mm × 50mm
Physical Specifications	
Material	Iron (White RAL 9016)
Grill	Powder-coated iron mesh (White RAL 9016)
Component Size	4 inches
Finished Color	White (RAL 9016)
Unit Weight	0.92 Kg
Packing Dimension	150mm
Speaker Specifications	
Voice Coil Size	PSV14-28D×1.2T
DC Impedance	7.2Ω
Former Material	Paper
Magnet	Ferrite (106g), Φ55×24×10 (Y30)
Basket Material	Iron
Cone Material	Paper
Spider	Cloth
Dust Cap	Paper
Net Weight	0.82 Kg
